## PROFESSIONAL SUMMARY

---

Results-driven BSIT graduate with hands-on experience in full-stack development, software architecture, data analysis, quality assurance, and IT field operations. Demonstrated ability to design and deploy production-grade web applications, RESTful APIs, and operational report systems using modern frameworks and cloud infrastructure. Holds Certiport certifications in Information Security and Cybersecurity, with strong proficiency in Laravel, React, ASP.NET Core, Docker, and serverless technologies. Adept at working independently and collaboratively in fast-paced, real-world IT environments.

## WORK EXPERIENCE

---

**Quality Assurance / Data Analyst / Developer** | *Globe Telecom Inc. — Customer Field Service (Broadband Team)* March 2026 – June 2026

- Developed and deployed multiple operational report systems including a Slot Adherence Report, Daily Aging Operations Report, and NAP Dashboard using ASP.NET C# and Google Apps Script, hosted on Google Sites.
- Executed data extraction, cleaning, and validation workflows by analyzing raw CSV files and cross-checking system outputs to ensure accuracy and consistency across all generated reports.
- Delivered a complete suite of fully functional report systems within the internship period, streamlining the team's operational reporting process and significantly reducing manual data handling effort for the Broadband Team.

## PROJECTS

---

**Full-Stack Developer & Architect** | *FOLD. — Enterprise Multi-Vendor Apparel Marketplace* 2026 – Present

- Architected and developed FOLD., a full-stack multi-vendor e-commerce marketplace platform built with Laravel 11 (PHP 8.4) RESTful API backend and a React 18 / TypeScript / Tailwind CSS v4 single-page frontend, featuring role-based interface isolation across three distinct portals — Buyer Storefront, Seller Studio, and Admin Command Center.
- Implemented enterprise-grade platform features including Stripe Connect multi-vendor payment processing with automated platform fee deduction and webhook-driven order settlement, Redis-backed job queues and session management, PostgreSQL 16 relational data store, real-time inventory management with variant SKU tracking, coupon and discount engine, PHPUnit test suite with 78 passing tests and 308 assertions, Larastan static analysis, and multi-stage Docker containerization with Nginx reverse proxy and PHP-FPM.
- Delivered a production-ready, containerized marketplace platform covering 40+ versioned REST API endpoints across authentication, catalog, cart, checkout, seller fulfillment, and admin governance — providing a scalable, secure, and fully documented foundation for a multi-merchant apparel business.

**Full-Stack Developer** | *Custom POS System — 444 Coffee Dvo, Doña Vicenta, Davao City* 2026 – Present

- Designed and developed a bespoke, cloud-native Point of Sale system for a live coffee shop establishment, built with React 19, TypeScript, Vite, and Cloudflare Workers as a serverless backend — featuring a Progressive Web App (PWA) interface with offline capability to ensure uninterrupted service during connectivity issues.
- Engineered core operational features including multi-payment support (Cash and GCash e-Wallet with staff confirmation workflow), real-time inventory management with automatic stock deduction based on product recipes, thermal printer integration via Bluetooth and network, Role-Based Access Control (RBAC) with PIN-based authorization for Staff, Supervisor, and Admin roles, VAT/tax configuration, and End-of-Day (EOD) reporting with Excel export and Recharts sales analytics.
- Successfully deployed and launched the system in active daily operations at 444 Coffee Dvo, hosted on Cloudflare Pages with a serverless SQLite backend (Cloudflare D1), HMAC-signed session security, and R2 object storage — replacing manual order tracking and streamlining the café's checkout, inventory, and reporting workflow.

**Full-Stack Developer — Capstone Project** | *FoodieSaur: Personalized Location-Based Food Assistant* 2025 – 2026

- Architected and developed FoodieSaur, an ASP.NET Core MVC (.NET 8) web application combining conversational AI (Dialogflow), Google Maps/Places API, and OAuth (Google/Facebook) to deliver real-time personalized food and restaurant recommendations based on user preferences, dietary restrictions, and health conditions.
- Implemented core system features including AI-powered chat assistant, location-based restaurant lookup, onboarding flow, favorites system, SignalR real-time messaging, prescriptive recommendation engine, and database export command using C#, SQL Server, Entity Framework Core, Razor Views, and Tailwind CSS.
- Produced a fully deployed and documented application at foodiesaur.runasp.net with comprehensive system documentation, test cases, Dialogflow/OAuth setup guides, and a database export, demonstrating end-to-end software development and deployment capability.

EDUCATION

**Bachelor of Science in Information Technology** | *University of Mindanao*  
Davao City, Philippines

September 8, 2026

CERTIFICATIONS, SKILLS & AWARDS

- **Technical Skills:** PHP; Laravel 11; C#; ASP.NET Core MVC; Entity Framework Core; SignalR; React 18/19; TypeScript; Vite; JavaScript; Google Apps Script; HTML; CSS; SQL; PostgreSQL; Redis; Tailwind CSS v4; Docker; Nginx; Stripe Connect; Cloudflare Workers; Cloudflare D1; Cloudflare R2; Dialogflow; Google Maps API; OAuth Integration; Basic Networking & Router Configuration
- **Competencies:** Full-Stack Development; REST API Design; Multi-Vendor Platform Architecture; Data Analysis & Validation; Quality Assurance; System Deployment; PWA Development; Serverless Architecture; Containerization; Database Management; Leadership & Team Mentoring; Technical Documentation
- **Soft Skills:** Critical Thinking; Problem Solving; Logical & Analytical Reasoning; Attention to Detail; Adaptability; Independent & Focused Working Style; Research-Oriented Mindset
- **Certifications:** Certiport Information Security Certification — Certiport Pearsonvue; Certiport Cybersecurity Certification — Certiport Pearsonvue

SEMINARS & EDUCATIONAL TOURS

**BSIT Educational Tour – Manila** | *University of Philippines & IT Institutions*  
• Participated in seminars covering Trends in Information Technology, Cybersecurity concepts, and real-world IT environments and workflows.

March 4–8, 2025
